PROFESSIONAL SUMMARY

Planning and Project Controls Engineer with 4+ years of experience across construction, facilities management, technical office, and site execution in Egypt and Saudi Arabia. Experienced in developing and updating Primavera P6 and MS Project schedules, establishing WBS and baselines, measuring progress, analysing critical paths and variances, and preparing lookahead and recovery plans. Additional exposure includes resource and cost loading, EVM, cash-flow reporting, BOQ review, procurement coordination, and technical documentation on the Daba'a Nuclear Power Plant and Shura Island developments.

CORE COMPETENCIES

Planning & Scheduling: Primavera P6, MS Project, WBS, baseline development, logic review, CPM, critical path, schedule updates, lookahead and recovery schedules

Project Controls: Progress measurement, planned vs. actual analysis, resource and cost loading, EVM, cash flow, forecasting, variance and delay analysis

Reporting & Data: Advanced Excel, PivotTables, X-lookup/Index-Match, S-curves, histograms, weekly/monthly reports, Power BI (basic dashboards)

Technical Coordination: AutoCAD, shop drawings, RFIs, material submittals, MTO, BOQ review, procurement, consultant and site coordination

PROFESSIONAL EXPERIENCE

Technical Office Engineer

Nov 2025 - Aug 2026

Obeikan Technical Fabrics Co. Ltd. | Shura Island, Saudi Arabia

- Led technical office coordination and structural shop drawing reviews using AutoCAD for fast-track works on the Shura Island tourism development.
- Prepared and reviewed material take-offs and BOQs to support procurement planning, material control, cost tracking, and prevention of budget variances.
- Managed RFIs and material submittals through consultant approval cycles and maintained logs for planned, submitted, approved, and delayed deliverables.
- Coordinated design consultants, site teams, and survey inputs to resolve structural and field constraints and maintain execution progress.
- Maintained red-mark and as-built drawing updates, submission records, and technical trackers across multiple work zones and assets.

Technical Office & Planning Engineer

Oct 2024 - Oct 2025

El Dakkar General Contracting | Daba'a Nuclear Power Plant, Egypt

- Supported planning and technical office activities for Units 3 and 4, including Buildings 31/32 and 41/42, within a highly regulated nuclear construction environment.
- Prepared and controlled material requests, work execution plans, design documentation, field change requests/orders, as-built records, and inspection documentation.
- Coordinated shop drawings, material calculations, engineering submissions, and consultant approvals with the site, engineering, and T2 interface teams.
- Tracked technical queries, submissions, constraints, and outstanding approvals that could affect planned construction activities.
- Supported progress monitoring, periodic reporting, lookahead coordination, and resolution of issues affecting engineering and site deliverables.

PROFESSIONAL EXPERIENCE - CONTINUED

Planning Engineer

Mar 2023 - Oct 2024

Prosper Egypt Facilities Management | Cairo, Egypt

- Developed and maintained Primavera P6 and MS Project baseline schedules for civil, MEP, maintenance, and facility-improvement activities.
- Structured WBS, calendars, activity logic, durations, and milestones; updated schedules using verified progress information from site and operations teams.
- Measured planned versus actual progress, reviewed critical-path movement and float consumption, and highlighted schedule variances and emerging delays.
- Prepared lookahead plans, recovery actions, weekly/monthly reports, S-curves, KPI/SLA tracking, and management dashboards using advanced Excel.
- Supported BOQ review, cost estimation, budget monitoring, cost-performance reporting, and technical inputs for facilities-management proposals.

Site Engineer

Dec 2021 - Dec 2022

Horus Contracting & Real Estate Investment | Cairo, Egypt

- Monitored civil and finishing works, coordinated daily site activities, and reported construction progress against planned priorities.
- Reviewed BOQs, executed quantities, contractor invoices, and project cost information to support payment and cost-control activities.
- Supported quality inspections, snagging follow-up, technical coordination, and compliance with project requirements.

SELECTED PROJECT CONTROLS PORTFOLIO

Primavera P6 Building Project Case Study

Independent Portfolio Project

- Built a detailed Primavera P6 baseline and update for a G+9 office building plus roof, with 1,206 activities.
- Developed WBS, calendars, activity relationships, durations, floor-to-floor sequencing, milestones, and critical-path logic.
- Assigned labour crews, equipment, materials, and assumed rates; completed resource and cost loading and resource leveling.
- Prepared S-curves, crew histograms, EVM and forecast analysis, lookahead reports, and delay and recovery recommendations.

EDUCATION

Bachelor of Construction Engineering | Egyptian Russian University, Cairo | 2021

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

PMP exam preparation in progress | PMI member

Google Data Analytics Certificate | Coursera Diploma

ISO 9001:2015, ISO 14001:2015, and ISO 45001:2018 awareness | Egyptian Society for Quality
